

Quick Select Buttons

Quick Select function:

This extremely convenient function allows for 3 presets which can be selected on the front panel or on the remote which automatically changes the configuration to suit individual requirements.

- Selects Input source
- Selects Surround mode
- Selects Room EQ settings
- Selects Volume
- Can be renamed to suit

This feature is extremely handy when you have multiple users such Mum, Dad and the kids, each person can have their own preferred settings on a single button.
